Bethany Stanley

Bellingham, WA 98225

bastanley1211@protonmail.com   LinkedIn   Portfolio Site

Skills

Languages:	Frameworks/Libraries:	Tools:
HTML	React, React Native, Redux	VS Code, Visual Studio(beginner)
CSS	Bootstrap	DevOps(beginner)
JavaScript	(learning)NodeJS, MongoDB, Express	Expo Go
	React-Router, Reactstrap	Snack Expo, CodePen, Glitch
		Github, Git Bash
		Android Studio

Selected Portfolio Projects

Jinsei Cafe (react class project): https://github.com/bastanley1211/jinseicafe
- Created a static React App utilizing various React third party libraries including React-Router
- I used VS Code, Yarn, Git Bash, Github, and Heroku
- I learned about creating a React app and a functional Single Page Application using React-Router. I created custom React Components, styled using Reactstrap and Bootstrap, passed state data to various components to display

Nucamp (a fictional campsite/class project): video demo-
https://drive.google.com/file/d/1__ciA9uFEtaGNQiZXLjmTVXqbTByE7Ad/view?usp=sharing
- Created a React Application and a Mongo/Express/Node back-end and deployed it via Amazon Web Services
- VS Code/ Git Bash/ GitHub/ AWS/ Postman(for back-end endpoint tests)
- I learned how to use cutting edge serverless back-end technologies, the latest practices in secure authentication, and how to connect it to a React Application.

Education

Nucamp Full Stack Bootcamp: Certificate	Aug 2021
SheCodes Basics: Certificate	Feb 2021
Codecademy HTML, CSS, and JS Courses	Jan and June 2021
California State University, Sacramento: BA in Asian Studies	May 2018
(Japanese)	

Professional Experience

Web Developer, 2021-present
Freelance, Remote
- I completed three privately contracted requests or projects between February and June 2021
- Successfully communicated with clients about their needs, including assessing quotes, receiving feedback, and editing and brainstorming solutions based on needs
- Project 1: Fixing Wordpress backend issues (some PHP, and version issues), plus using a premade theme and custom css to avoid deprecated PHP issues
- Project 2: Same as first project, plus using plugins and custom css to customize site more fully
- Project 3: Created a one page landing page from scratch using HTML, CSS, and Bootstrap; integrated a hubspot form; set up domain and custom DNS to host the website via Github Pages.
